# Food Safety and Quality Control

At Super food, food safety and quality are of paramount importance. We implement systematic food hygiene practices (GMP) and perform regular risk assessments to identify and address potential food safety hazards (HACCP) as part of our daily operations.

We are committed to ensuring the highest quality and freshness of our products at Super food. To achieve this, we closely supervise and maintain a strict production process that enables us to offer top-quality products at the most competitive prices.

We adhere to strict internationally recognized standards and obtain specific certificates for sophisticated products that comply with local legislation and religious requirements. All our products are certified, which guarantees that they meet the highest quality and safety standards.

# Deionized Fruits

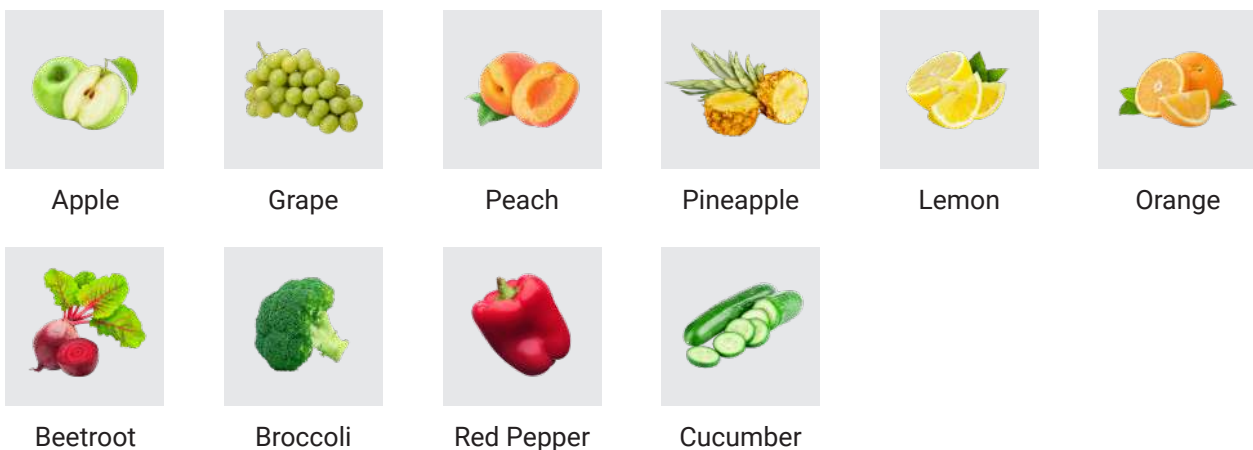

Contains natural fruit sugars, low glycaemic index as a concentrated fruit extract or fruit sugar.

## Nutritional composition

This product is composed mainly of sucrose, glucose and fructose in variable percentages depending on the fruits used. They can be manufactured from a single fruit or from a mixture of fruits in different proportions.

The deionized fruit extract is a liquid in the form of a concentrated syrup containing a dry matter of 65-70% with a high viscosity.
